**Aragon Basic Data (ABD)** is a statistical product that compiles a selection of the most demanded data about the social and economic reality of the Autonomous Community of Aragon.

Different versions are available:

- *Updated ABD* (only in Spanish): it periodically incorporates updates of part of its contents whenever they come available. Each page includes the date of the latest update.

- **Annual ABD** (Spanish and English versions): annual still photo; we must take into account that:

- The year that appears in the publication's title is the corresponding edition's.
- Every depicted table or subject includes a time reference corresponding to the date in which data were recorded by the reporting entity or when the event to be measured took place.
- The collected data are the latest available ones at edition date.

- *Accessible Annual ABD* : simplified version in order to minimise the difficulties that might result into an access barrier.

From 2004 onwards waste water not coming from the supply network is added (pluvial, self-extraction and other sources).

From 2007 inclusive, it is explicitly requested in the survey questionnaire the amount of the cleaning tax that is charged by delegated city councils or other entities managing the cycle of water. This leads to a better estimation of the charged amounts on waste water treatment, which must be taken into account when comparing the indicators of water unitary cost with previous years.
